

## **SOLIDARITY IS OUR WEAPON**

There is no doubt that there has been an alteration of social conditions. Under the guise of economic crisis, international capitalists and the Greek government harden their attitude against workers and the unemployed, against immigrants and refugees and attack with all means to all those who are left over from the capitalist machine and those who obstruct its plans.

However, the promotion of the most fascist and conservative attitudes by the state, the police, the local and the foreign bosses and the media armed many bully bastards who under the coverage of the state, attack the immigrants. The systematic rise of fascism goes hand in hand with the extortionate dilemmas of bankers, lenders and governments, with poverty and misery that are steadily rising, with fear and estrangement with which they try to cause discrimination among the most repressed parts of this society. They want us alone and powerless, silent and frightened, lost in fraudulent segregations based on blood, origin, religion, sex or sexual orientation, so that they can continue to drink our blood, exploit us and enrich themselves on our backs.

There is nothing that can divide the exploited of this world. Unity and solidarity should be our weapons against the new totalitarianism. Together we can build communities of our struggles through which we fight to eliminate injustice and oppression of man by man. In this war the enemy (either cops or fascists) fortifies itself, attacks and tries to drown every single reaction. The only optimistic perspective opened to everyone, is that of struggle. A confrontational and without leadership struggle, that is able to crush the fascist bastards and their minions, but at the same time is ready to give birth to the world of freedom, solidarity and dignity.

Let the struggle be our celebration during which we

- > Organize joint struggles among natives and immigrants
- > Safeguard public spaces and squares from fascists
- > Create mutual relationships beyond borders and religion
